

AMENDMENTS

Amendments to the Specification:

Please replace paragraph 0021 with the following replacement paragraph:

[0021] Figure 22a is an exploded perspective view illustrating one embodiment of a clip-on damped spring

Figure 2b is a side cross-section view illustrating layers of one embodiment of a clip-on damped spring;

Please replace paragraph 0029 with the following replacement paragraph:

[0029] Figure 1 illustrates one embodiment of an enclosure device 100 for mounting storage devices (not shown). In the depicted embodiment, the enclosure device 100 includes an enclosure chassis 102. The enclosure chassis 102 comprises a top member 104, a bottom member 106, first and second side members 108 and 110, and a plurality of vertical mounting surfaces 112 that partition the enclosure chassis 102 into a plurality of horizontally and vertically aligned drive bays 114. The top member 104, bottom member 106, and first and second side members 108 and 110 form a box for holding the storage devices. The mounting surfaces 112 include a receiver 115 secured to the mounting surface 112. The receiver 115 is configured to receive a storage device carrier retaining a disk drive. The receiver 115 positions the storage device carrier relative to the mounting surface(s) 112. The storage device carriers~~devices attach to~~engage the mounting surfaces 112 by way of the receiver 115. In one embodiment, the receiver 115 comprises a pair of rails that engage the storage device carrier. This embodiment also

includes an interface device shelf 122 positioned between the horizontally aligned drive bays 114.
